

Course Feedback Survey

Introductory text

Thank you for completing this course feedback survey.

This survey is designed to understand your learning experience in this course and to identify areas for improvement.

Your responses are anonymous. The survey should take about 2–3 minutes to complete.

Response scale for Questions 1–12

Please indicate how much you agree with each statement.

Answer options for Questions 1–12:

- 1 = Strongly disagree
 - 2 = Disagree
 - 3 = Neutral
 - 4 = Agree
 - 5 = Strongly agree
-

Questions

Q1

I clearly understand what this course expects me to achieve by the end.

Answer options:

- Strongly disagree
 - Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Q2

When completing assignments, I clearly understand what level of work is expected to meet the required standard.

Answer options:

- Strongly disagree
- Disagree
- Neutral
- Agree
- Strongly agree

Q3

The teaching in this course helps me turn abstract ideas into knowledge that I can actually use.

Answer options:

- Strongly disagree
- Disagree
- Neutral
- Agree
- Strongly agree

Q4

The pace and depth of explanation for complex content are generally appropriate for me to keep up with the course.

Answer options:

- Strongly disagree
- Disagree
- Neutral
- Agree

- Strongly agree
-

Q5

The examples, demonstrations, or learning activities in class genuinely help me understand the course content.

Answer options:

- Strongly disagree
 - Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Q6

The teaching in this course provides enough support for me to complete the assignments or assessments.

Answer options:

- Strongly disagree
- Disagree
- Neutral

- Agree
 - Strongly agree
-

Q7

The assignments or assessments in this course feel more like a fair test of learning than a process of guessing what the teacher wants.

Answer options:

- Strongly disagree
 - Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Q8

The feedback I receive is specific enough to help me understand how to improve.

Answer options:

- Strongly disagree
- Disagree

- Neutral
 - Agree
 - Strongly agree
-

Q9

Feedback is provided early enough for me to use it in my later learning or assignments.

Answer options:

- Strongly disagree
 - Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Q10

The workload in this course does not significantly reduce the time I need to understand and absorb the content.

Answer options:

- Strongly disagree

- Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Q11

The pace of this course gives me enough opportunity to consolidate what I have learned before moving on to the next part.

Answer options:

- Strongly disagree
 - Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Q12

Although this course is challenging, I still feel that it is worth the effort overall.

Answer options:

- Strongly disagree
 - Disagree
 - Neutral
 - Agree
 - Strongly agree
-

Open-ended question

Q13

If you could change only one thing, what should this course improve first?

Please be as specific as possible.

Answer format:

- Short written response

The purpose of this survey is to collect course feedback in a way that is both efficient and actionable. It is designed not only to measure student satisfaction, but also to identify specific aspects of the course that shape the learning experience, such as clarity of expectations, alignment between teaching and assessment, and the usefulness of feedback. The survey is informed by established course evaluation frameworks, particularly the Course Experience Questionnaire (CEQ) and Students' Evaluations of Educational Quality (SEEQ), both of which emphasise multidimensional feedback on teaching and learning quality. Based on these models, the survey was adapted to be more specific and student-centred. Instead of using broad statements about satisfaction or teaching quality, the questions focus on common student pain points, such as unclear standards, difficulty applying concepts, or feedback that is too vague or too late. This helps produce more precise and actionable results. The final open-ended question — “If you could change only one thing, what should this course improve first?” — was designed to encourage students to identify their most important concern. Compared with a general question like “Any other comments?”, this wording is more focused and makes the qualitative feedback more useful while keeping the survey brief.
